Lot #2

NEW YORK 1787 NOVA EBORAC COPPER

1787. New York NOVA EBORAC COPPER. Rev. seated figure faces right. Heavy rim break involving foot, like the Guide Book plate coin. Obv. better than Fine, some details VF; Rev. more bold though with somewhat more wear than Obv. on higher surfaces. Attractive steel colored surfaces. Better than lot 47 of our GENA 1973 Sale at \$325.

Respectfully submitted,

Walter Breen

CERTIFICATE OF GUARANTEE

I hereby certify that the lot listed below as described in the F.U.N. 1979 Auction Sale of January 5-6, 1979, is guaranteed absolutely authentic and as described below:

LOT 90

COLONIAL COIN

1787 Immunitis Columbia. Usual late die state, narrow thick flan. Very good, but unusually for this issue, date is almost full; everything on flan except bases of date and top of E (rev.). Struck at the Rahway (N. J.) Mint, spring 1787, on behalf of General Matthias Ogden's proposal for a federal contract coinage, from dies made by its then fulltime engraver James F. Atlee, who made most dies for the Rahway Mint's N. J. coppers. This Ogden proposal was referred to the corrupt head of the Board of Treasury, Col. William Duer, who had already decided to award the contract to James Jarvis instead, in consideration of a \$10,000 bribe. A historic issue, beginning to come into its own! Ex Bowers, Sept. 1973.

Lot # 405

1786. VERMONTENSIUM. BB-5 = RR-7. "Fine, chocolate brown with darker touches around letters; entire legend on flan, Q weak though everything is legible. Planchet a little less defective than usual. Nice enough that it was obtained as "VF", far above average for the design", where it was lot 30 of our 1973 G.E.N.A. sale. Sharper than Groves 315, or the ANS coin pictured in Richardson; at least equal to one offered by Bowers at \$595.

Respectfully submitted,

Walter Breen
